APPLICATION DETAILS

Central to any application made is the program of work proposed for each year of the six year term. Applications are to be made in accordance with Section 31 of the Petroleum and Geothermal Energy Resources Act 1967. Consideration of an application for the grant of a Permit shall take into account work programs relative to the whole of the area applied for, the adequacy of the work program, and the applicant’s technical and financial ability to undertake the work. Permits are awarded on the understanding that the first two years work commitment will be fulfilled without variation.

Where there is more than one applicant to the application, the percentage participating interest of each party to the application is to be supplied. This is to include evidence that a satisfactory settlement has been, or can be, reached on a Joint Operating Agreement (copy of Heads of Agreement dealing will generally suffice).

Applicants should also make themselves aware of the existence of any areas which have the potential to restrict exploration activities, e.g., National Parks, Nature Reserves, Marine Parks, World Heritage Areas, Conservation Reserves, Defence Areas and Mining Titles.

Insofar as Reserved Land is concerned, entry for exploration purposes is subject to approval by the Minister. In this regard, it should be noted that Government policy, at least, is such that petroleum extraction from within National Parks, Nature Reserves and access to Conservation Estates should not be presumed.

Any applications over the above onshore areas may be subject to the provisions of the Commonwealth Native Title Act 1993 and applicants should be prepared to negotiate with Native Title parties pursuant to the right to negotiate provisions of the NTA.

Applicants should also be aware that onshore areas available for petroleum application are subject (at least in part) to Native Title claims. Plans showing these claim boundaries are available as part of the release package.

An information package on the release areas detailing the criteria for assessment of applications and the conditions to apply following the award of a permit, and including a plan of the release areas and an application proforma, is available on CD-ROM. Copies of the CD-ROM can be obtained from the Petroleum and Environment Division, Department of Mines and Petroleum by contacting the Petroleum Applications Receiving Officer on (08) 9222 3106.

LODGEMENT OF APPLICATIONS

Applications, together with supporting data, should be submitted in the following manner and accompanied by fee of $3,900.00 (non-refundable) payable to the Department of Industry and Resources through an Australian Bank or by Australian bank cheque.

The following special instructions should be observed—

- The application should be sealed and clearly marked “Application for Petroleum Exploration Permit—Commercial-in-Confidence”.
- Unless delivered by hand to the Petroleum Applications Receiving Officer, the sealed application (as described above) should be enclosed in a plain covering envelope or package and forwarded to the following address—
  
  Executive Director, Petroleum and Environment Division  
  Department of Mines and Petroleum  
  Mineral House  
  100 Plain Street  
  East Perth WA 6004  

  Attention: Petroleum Applications Receiving Officer

Confirmation of receipt of applications (delivered and received by hand) will be issued by the Petroleum Applications Receiving Officer.

This application needs to observe the closing time and date as published in the release package. Applications received after the closing time and date will not be considered.
