(10) Tees, thimbles, bends, reducing couplings, plugs, etc., shall be of the best material and manufacturers' standard, regular, and of equal thickness, properly and truly cut with the British standard thread, perfectly sound and new, and free from all defects. The tees, bends, tubes, etc., shall be capable of withstanding hydrostatic pressure of 300 lb. per square inch, shall be tested to this pressure by the duly authorised officer, and shall conform otherwise to the British standard specification existing at the time.

(11) All joints between pipes, tees, bends, thimbles, couplings, elbows and cocks, etc., shall be made with flax or other approved jointing material. All joints on lead pipes shall be of the kind known as "wiped joints," and all connections between lead and iron water pipes shall be made with brass couplings and wiped joints.

(12) No pipe or other apparatus shall be laid through any sewer, drain, ashpit, cistern, or manure bin, or through, in, or into any place where, in the event of the pipe becoming unsound, the water conveyed through such pipe would be liable to be polluted or to escape without observation, unless such pipe or apparatus be laid through an exterior approved iron pipe or box of sufficient length and strength to afford due protection to the same and to bring any leakage or waste within easy detection.

(13) All taps, stop-cocks, ball-cocks, valves, other fittings or apparatus used in connection with the supply of water shall be of approved types and capable of withstanding a pressure of 300 lb. per square inch, and shall be tested and stamped by the duly authorised officer of the Minister before being fixed.

(14) No valve, cock, or apparatus of any description shall be permitted unless the construction of the same is such that a rise in pressure of not more than 10 lb. per square inch shall occur when the valve, cock, or apparatus is closing.

(15) Every cistern and tank shall be provided with an equilibrium ball valve and stop-cock, and the overflow pipe shall be laid and fixed in a suitable manner, so as to discharge in some conspicuous place open to inspection.

(16) No service pipe on private property below the ground surface shall be laid at a less depth than 18 inches, unless otherwise approved by the Minister.

(19) Every water closet, urinal, slop hopper or other fixtures as directed by the Minister shall be supplied from the service pertaining to the building through an approved waste-preventing apparatus. No service pipe shall communicate directly with the fixture, or otherwise than with the cistern.

(20) Unless otherwise approved by the Minister, the outlet of every fixture such as baths, lavatory basins, kitchen sinks, etc., shall be distinct from and unconnected with the inlet, and the inlet shall be placed at least one inch above the highest water level of such fixtures. The outlet of every fixture shall be provided with a perfectly watertight plug, and shall be constructed so as to prevent a waste of water.

(21) Projection pieces between a bib tap and a fitting on the end of a horizontal water service pipe shall not be permitted unless so supported as to prevent the pipe and tap swinging downwards.

(22) All taps over fixtures shall be so arranged that any drips from same will fall within the fixture.

(23) Stand pipes not secured to buildings shall be securely fixed to an approved support fixed in the ground.

(24) Pipes shall be secured to woodwork by means of approved galvanised clips and screws and to concrete, stone or brickwork with approved galvanised hooks or bolted clips.

In no case shall any water pipes or apparatus in connection with water supply be used until the said work shall have been inspected, and, if necessary, tested by the said officer, and certified by him on the prescribed form. No underground or enclosed work shall be covered up or concealed from view until the same shall have been duly inspected and passed by the Inspector, and for this purpose the person to whom the permit has been issued shall immediately report any work which is ready for inspection or test, and every facility shall be afforded to such officer for making such inspection or tests.

Division VII.

Rating.

89. (a) Within the Morawa Water Area the water rate shall be at a rate not exceeding three shillings in the pound per annum upon the net annual value of all rateable land: Provided that a minimum rate of one pound per annum shall be payable on each separately assessed piece of land. (b) In making rates a distinction may be made between occupied and vacant land, and in the event of a dispute as to whether or not land shall be regarded as vacant, the decision of the Minister shall be final in every case.

Rates—How Payable.

90. Rates shall become due and payable yearly in advance on the first day of November: Provided that in all cases where a rate is made after the first day of November in any year the notice of the order for the making and levying of such rate, published in the Government Gazette and a newspaper, as provided by Section 94 of the said Act, shall specify the minimum sum payable as rate as aforesaid, and the date or dates when the rates shall be due and payable, and such rate shall be and become due and payable in accordance with the terms of such notice.

Allowance for Rate.

91. Subject to the provisions of these by-laws, every ratepayer will be entitled to consume on each separately assessed piece of land of which he is the owner or occupier that quantity of water which, if calculated at the price specified in the Schedule I hereto as being that at which water is supplied in the area in which such property is situated would amount to the equivalent of the water rate paid on each property, provided that such water is taken during the period for which the rate is struck.

92. When, during the currency of the year in respect of which a water rate has been levied, a meter is attached to a pipe on any land supplied with water, the consumer shall pay for the quantity of water taken, as registered by the meter, from the time when the meter was attached, at the prescribed price per 1,000 gallons, so far as the water supplied is in excess of the quantity to which the consumer is entitled in respect of the proportionate part of the rate paid by him, apportioned to the period from the date when the meter was attached to the end of the then current year in respect of which the rate was paid.

Payment for Excess Water.

93. Every consumer taking water in excess of the quantity to which he is entitled in respect of the rate or other charge in lieu of the rate shall pay for the excess in accordance with prices set forth in the Schedule I hereto.

Fees—State or Commonwealth Government Departments.

94. For each water service for purposes of any State or Commonwealth Government Department there shall be payable, as a minimum annual fee in lieu of water rate, the sum of not less than one pound (£1) when the service is metered, and of not least one pound ten shillings (£1 10s.) when the service is non-metered.

It shall be at the discretion of the Minister as to whether or not a meter shall be fixed in each case.

This by-law shall not apply to water for railway purposes.

Fees for Additional Services.

95. When any place where the owner or occupier of any separately rated piece of land requires more than one service to be installed for supplying water to such land, such additional service or services shall, at the discretion of the Minister, be installed on such occupier or owner paying in advance the cost of installation and a fee of not less than one pound per annum in addition to meter rent, for each additional service.

In return for an equivalent quantity of water will be given in each year, in the same way as water is given in return for water rates.

Meter Rents.

96. Every person supplied with water by measure shall pay meter rent in advance according to the following scale unless the Minister shall otherwise determine:

97. In every case in which the supply of water shall have been cut off by reason of non-payment of rates or other charges, or by reason of a defective service, or by request of the occupier or owner, or when, in the opinion of the Minister or local officer, necessary to prevent waste of water, or for other reasons, a minimum fee of five shillings shall be charged before the service is reconnected provided that where cost of disconnection and reconnection exceeds the minimum fee the actual cost of the disconnection and reconnection, as determined by the Minister, shall be charged, and shall be payable by the owner or occupier for the time being, on demand. The service shall not be restored until such fee has been paid.

Private Fire Services.

98. Private fire services will be allowed, but every such service shall be sealed, except in cases where the Minister may decide that sealing is unnecessary. For each such service the owner or occupier shall pay in advance the actual cost of installation and a minimum annual fee and meter rent as determined by the Minister in each case, and such owner or occupier shall also bear the cost of maintaining the boundary service and of having it disconnected when it is no longer required.
The owner or occupier for the time being shall in addition at his own risk and expense, and subject to the provisions of these by-laws, keep the internal fire service in good order and repair, so that the same shall at all times be in accordance with the by-laws. No water shall be taken from any sealed portion except for extinction of fire. In the event of the seal having been broken in case of fire or by accident or otherwise, the owner or occupier shall give notice forthwith to the Department and pay the cost of re-sealing.

Building Fees.

99. Where water is required for building purposes the Minister may permit the supply thereof at prices as set forth in Schedule I hereto and on the following terms:

(a) All fees shall be paid in advance. If any work is done other than that mentioned at the time of applying to the Minister, the same shall be paid for in advance, or the whole supply will forthwith be cut off.

(b) It shall be at the discretion of the Minister as to whether or not any case a supply of water shall be classed as a supply for building purposes, and as to whether or not the supply shall be measured by meter.

(c) Applications for water under this by-law shall be in writing, stating the nature of the work to be done and the purpose for which water is required.

When Accounts Due and Payable.

100. Where water is supplied by measure to the owner or occupier of land, whether rated under the Act or otherwise, payment for same shall become due and payable within 14 days after service of the account, unless otherwise agreed upon.
