1. Rezoning Avon Locations 3686, 7134 and 7325 from “Agriculture – Local” to “Rural Small Holding”.

<table>
<thead>
<tr>
<th>No.</th>
<th>Description of land</th>

</thead>
</table>
| 5   | Avon Locations 3686, 7134 and 7325 | Subdivision shall generally be in accordance with the Development Guide Plan adopted by Council and endorsed by the Chief Executive Officer, and adopted by the Western Australian Planning Commission. Clearing of land including Remnant Vegetation is not permitted other than in accordance with clauses 5.14 and 5.20.4. If, in the opinion of Council, over-grazing by livestock is causing degradation to the landscape or land degradation that may lead to soil erosion, Council may issue an order to the property owner requiring a reduction in the number, or total removal, of the livestock. Within the Vegetation Management Area shown on the Development Guide Plan it is the objective of Council that the revegetation within the area is protected from fire and excessive grazing. The following management provisions will apply—

(i) the area is to be maintained as a low fuel area as a precaution against the destruction by fire of the revegetation within the area;

(ii) where the Vegetation Management Area falls within a lot it is to be fenced from the balance of lot;

(iii) at the discretion of Council controlled grazing within the Vegetation Management Area to reduce the fire hazard resulting from heavy fuel loads may be permitted providing damage to the revegetation is minimised;

(iv) where fuel loads are not reduced by grazing the landowner is required to reduce the fire hazard by mechanical means.

(v) these provisions are to be the subject of a notification under Section 70A of the Transfer of Land Act 1893 endorsed on the Certificate of Title. |

1.3 Existing Zoning
Agriculture—Local.

1.4 Existing Landuse
Grazing and residence

2.0 LAND FORM AND SITE DESCRIPTION

2.1 Topography
The area proposed for rezoning is a gentle valley with slopes not exceeding 7% apart from a rocky outcrop on the northern boundary. In the valley floor there are Pindalup landforms with some areas subject to waterlogging and salinization. Some surface rock exists in the Yalanbee landform of the lateritic upland, but elsewhere very little rock is evident.

2.2 Vegetation
Most of the property had been parkland cleared, and pasture established for grazing livestock. Small areas of jarrah and marri woodland occur on the lateritic uplands. Replanting has taken place in several areas—mostly in the valley floor.
### 3.0 LAND CAPABILITY ASSESSMENT

For land capability assessment purposes the soil types found on the site can be considered as one mapping unit, as the soil characteristics vary in capability rating only in terms of fertility and soil moisture availability. Neither of these factors have a significant bearing on the principal land use. An exception to the single mapping unit, however, is a small area of land at the head of the valley floor that is subject to waterlogging.

The following land qualities have been assessed using the Department of Agriculture guide-line for “Land Capability Assessment for Local Rural Strategies” as a basis—

<table>
<thead>
<tr>
<th>Quality</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ease of excavation</td>

<tr>

</tr>
<tr>

<tr>

</tr>
<tr>

</tr>
<tr>

<tr>

<tr>

</tr>
<tr>
<td>Rooting conditions</td>
<td>good</td>
</tr>
<tr>
<td>Soil trafficability</td>

</tr>
<tr>

</tr>
</tbody>
</table>

This assessment indicates a high capability for the proposed rural residential use, with some physical limitations that could be controlled with standard management procedures. Similarly, grazing and cropping, and limited annual and perennial horticulture could be undertaken with the usual precautions against erosion.

### 4.0 SCHEME PROVISIONS

The Shire of Northam Town Planning Scheme 3 states at 2.1 that Scheme determinations are to conform with the Local Planning Strategy (LPS). At 5.8 the LPS states for Bakers Hill—

*It is considered that subdivision may be possible within a 5 kilometre radius from the centre of Bakers Hill as illustrated on the Local Planning Strategy map. It is further proposed that smaller size rural residential lots (i.e. 1ha to 2ha) be considered within a 2 kilometre radius of the town centre, that larger size rural residential lots (i.e. 2ha to 5ha) be considered within a 2 to 4 kilometre radius of the town centre, and that larger rural smallholding type lots (i.e. 5ha to 20ha) be considered from 4 to 5 kilometres from the town centre.*

It further states under Rezoning and Subdivision Criteria that—

*The local government will not support the subdivision of land surrounding the Wundowie, Bakers Hill, Clackline and Grass Valley townsites for rural residential/rural smallholding purposes until such land is appropriately zoned. Proponents of subdivision within these areas are therefore required to make all necessary arrangements with regard to a suitable zoning classification in Town Planning Scheme No.3 prior to submission of a formal subdivision application. Any proposal for rezoning and subdivision for rural residential/rural smallholding purposes around these settlements will only be supported by the local government where it is able to satisfy the following criteria—*

(i) Where it is located within the Rural Townsite Precinct Boundaries as depicted on the Local Planning Strategy map;
(ii) Where it avoids areas required for the future logical urban expansion of existing townsites;
(iii) Where it is not located on land identified as having significant agricultural potential;
(iv) Where it will not reduce or conflict with the long-term agricultural potential of adjoining land;
(v) Where safe and efficient road access can be provided;
(vi) Where essential services are capable of being provided and maintained efficiently and at reasonable cost;
(vii) Where the scenic landscape, conservation and heritage attributes of an area will not be compromised including scenic vistas along major roads;
(viii) Where bush fire risk can be suitably managed;
(ix) Where natural primary resources including prospective areas for mineralisation and basic raw materials, water catchments and areas of environmental significance are protected;
(x) Where it is not located within any defined floodplain;
(xi) Where the risk of land and water degradation are minimal, development will not lead to any adverse impacts in terms of flooding, soil erosion, landslip or any other form of environmental impact and environmental protection and repair are promoted;
(xii) Where a detailed site analysis and assessment has been undertaken which demonstrates that the land is of fair to very high capability of sustaining the proposed development and use.

This proposal is able to meet these criteria and is well located to minimise the impact of the development on the rural character and amenity of the locality.

OCCUPATIONAL SAFETY AND HEALTH ACT 1984

OCCUPATIONAL SAFETY AND HEALTH REGULATIONS 1996

EXEMPTION CERTIFICATE PURSUANT TO REGULATION 2.13

(No. 20 of 2006)

I, Nina Lyhne, WorkSafe Western Australia Commissioner, hereby grant an exemption to High Performance Ltd T/A Skadada (hereafter known as Skadada) from the requirements of the following regulations of the Occupational Safety and Health Regulations 1996—

• Regulation 4.53(2)(a) through to Regulation 4.53(2)(e), inclusive; and
• Regulation 4.54(4)(c) insofar as it relates to the requirements of Section 6.18 of AS 2550.1—2002

insofar as the above require a person or persons suspended from a crane to be accommodated in a workbox. This exemption relates to the use of two cranes for single and multi-crane hoisting to suspend aerial performers during a rehearsal and two performances at the Ascot Race Course on 1 January 2007.

I further grant an exemption from Regulation 4.54(7)(b) in relation to the trapeze acts and the use of two cranes for multi-crane hoisting to suspend persons between the cranes during the abovementioned rehearsal and performances.

I also grant an exemption from the requirements of Regulation 4.54(3) in relation to the use of the two cranes in the abovementioned rehearsal and performances.

The following conditions shall apply with respect to use of the cranes—

• notwithstanding that Section 6.18.2 of Australian Standard AS 2550.1 refers to use of a workbox, from which requirement Skadada is exempted, the requirements for the cranes listed in clauses (a) to (h) of 6.18.2 shall still apply;
• the crane operators shall remain at the controls of the crane at all times during the performance;
• the only crane motion permitted whilst a person is suspended from the crane hooks is hoist up or down at slow speed;
• a means of lowering the persons in the event of an emergency or failure of the power supply to the cranes is provided;
• a certificated dogger or rigger oversees the attachment of the lifting gear to the crane hooks;
• the trapeze acts must not exceed the rated capacities for dual crane lift restrictions; and
• a full site-specific risk assessment must be conducted and, where necessary, control measures implemented.

This exemption is valid on 1 January 2007 only.

Dated this 22nd day of December 2006.

NINA LYHNE, WorkSafe Western Australia Commissioner.
