- (3) The entry in the other Appendix will name the explosives and specify the criteria to be satisfied before they may be transported; for example the explosives must be mixed with diluents, stabilizers, inhibitors, desensitizers, phlegmatizers, solvents, wetting agents or adulterants to overcome the inherent instability of the explosives.
- (4) The entry in this Schedule refers to explosives that do not meet the criteria specified in that other Appendix.
- (5) This list is not an exhaustive listing of explosives that are too dangerous to be transported.
